- 4. Standard Care Service**
- 5. Premium Care Service**
- 6. Premium Care with Accidental Insurance (Optional**
- 7. Care Service Extension Procedure**

1. According to the contract signed at the time of purchase, all Scantech 3D scanners and accessories are covered by a warranty period of 14 months from the date of shipment. The warranty period for the scanner starts from the manufacturer's shipment date.

- 1) Consumable parts such as markers and magnetic coded markers are not covered under the warranty.
- 2) The warranty period for externally purchased accessories is subject to the warranty policy of the respective purchased accessories.
- 3) Repair during the 14 months warranty period is not extending the warranty period.

2. Equipment malfunctions caused by non-human factors during the warranty period can be repaired free of charge, while malfunctions caused by human factors or damages outside the warranty will require paid repairs.

- 1) For the warranty to be valid, the scanner must be returned in its original protective packaging in all circumstances. Depending on the type of scanner, the original packaging can be a foam-lined hard case (or, in some cases, a protective wooden transport case for larger equipment).
- 2) It is the user's responsibility to keep the original packaging. The packaging for returning the device for repair needs to be done using Scantech's original packaging or packaging approved by Scantech's after-sales personnel before it can be returned. If the packaging of the scanner received by Scantech is improper, Scantech will provide appropriate packaging for the equipment, and the end user will bear all costs.
- 3) If warranty repairs are needed, please contact your local Scantech distributor or directly contact the Scantech manufacturer to assist in shipping your scanner to Scantech and provide all necessary information regarding the process.
- 4) If a Scantech scanner is damaged upon arrival (DOA), the purchaser has 30 (thirty) days to return the product to Scantech for replacement. DOA must be confirmed in writing by Scantech's professional after-sales service personnel. Failure to return the scanner within 30 (thirty) days after the delivery date or without Scantech's confirmation will result in the scanner losing eligibility for DOA replacement, and repairs will be carried out under normal warranty conditions.

- 5) The warranty does not apply to any damage or defects resulting from misuse or improper use, including but not limited to alterations, modifications, negligence, misuse, connection to incorrect power sources, exposure to harsh conditions or liquids, and damage caused during transportation. The warranty also does not cover lost, stolen, dropped, shattered, or modified products.
- 6) Warranty void if unauthorized repair or tampering is discovered during scanner inspection
- 7) Scantech does not return replaced repair parts.
- 8) Only authorized Scantech repair technicians are permitted to repair Scantech equipment.
- 9) If you have any problems with your Scantech scanner or need technical assistance, please contact your local Scantech dealer first. Or you can email: support@3d-scantech.com to contact Scantech support team.

3. After the warranty period, remote inspection and processing by Scantech's after-sales service personnel are required for products purchased with extended care service, for products that are purchased with extended care service, remote inspection and processing by Scantech's after-sales service personnel are required. The renewal contract can be signed only after the inspection is deemed satisfactory.

- 1) The care service for the scanner includes the replacement of parts and labor costs.
- 2) Scantech software purchased by the customer is eligible for free upgrades and maintenance during the care service.

3) Provision of Backup equipment:

3.1) If the scanner is within the scope of Premium care service, Scantech will provide the customer with a similar or higher-configured scanner for use free of charge during the maintenance period when the equipment is returned for repairs. The customers are eligible for a 50% discount on the rental fee for backup equipment.

3.2) If the scanner is within the scope of standard care service, Scantech will provide the customer with a similar or higher-configured scanner for rental during the maintenance period when the equipment is returned for repairs.

4) During the care service period, Scantech will provide one free calibration.

| Care Service | | | |
|--------------------------|--|---|---|
| Classification | Standard Care | Premium Care | Accidental Insurance |
| Contents | Scanner (including parts and labor) | Scanner (including parts and labor) | Scanner (including parts and labor) |
| Software Upgrades | Free | Free | Free |

| Re-calibration | Once | Once | Once |
| Transportation | Only covers one-way transportation costs | Covers round-trip transportation cost | Covers round-trip transportation cost |
| Accidental Damage | Exclude | Exclude | Include |

The care service for repairing or replacing internal components is 1 year, excluding damages caused by human factors.

Transportation costs exclude custom brokerage fees, duties, taxes, and VAT.

4. Standard Care Service

Scantech provides standard maintenance for its 3D scanners with a care period of 14 months from the date of purchase (excluding automated solutions). This standard care includes repairs or replacement of faulty components, excluding damages caused by human factors.

1) Backup Equipment Service (optional, additional charges apply)

As part of the standard care, Scantech offers customers the option to rent backup equipment, ensuring minimal disruption to their operations during the repair process. The terms and conditions for renting backup equipment will be outlined in a separate

agreement.

5. Premium Care Service

Scantech offers a premium Care option to provide premium service support for our valued customers. The premium care includes all the terms of the standard care and the following additional features:

1) Free Backup Equipment Service

Customers with the premium care are entitled to rent backup equipment free of charge when their scanner requires maintenance or repairs. Scantech will provide suitable backup equipment of at least the same model as the one in use, ensuring uninterrupted use of the scanner during the service period. The terms and conditions for the backup equipment service will be outlined in a separate agreement.

2) Inclusive of Round-trip Transportation Costs

For customers with the premium care, Scantech covers the transportation costs associated with equipment maintenance or repairs, including round-trip transportation of the scanner to and from our service center. This ensures a hassle-free experience for our customers.

6. Premium Care with Accidental Insurance (Optional)

For customers who require additional insurance coverage against accidental damage, Scantech offers a premium care with accidental insurance. This care option includes all the terms of the premium care and the following additional features:

1) Accidental Insurance

The premium care with accidental insurance provides comprehensive protection against accidental damage to the 3D scanner, including drops, spills, and other unforeseen events. In the event of accidental damage, Scantech will repair or replace the scanner as needed.

7. Care Service Extension Procedure

When the end user's warranty has expired and they want to purchase the care service,

the following procedure should be followed:

1) Remote Connection Diagnosis

To assess the current condition of the scanner and ensure its eligibility for care service extension, Scantech's after-sales technical support team will arrange a remote connection diagnosis with the end user's device. This remote diagnosis session allows our experts to remotely inspect the performance of the scanner and identify any potential issues or maintenance requirements. Scanners that do not meet the criteria for care service extension will need to undergo repair and calibration before entering the care service extension program.

2) Evaluation and Report

Based on the results of the remote connection diagnosis session, Scantech's technical support team will evaluate the condition of the scanner and provide a detailed report to the end user. This report will outline any necessary repairs, maintenance, or calibration recommendations to bring the scanner up to the standards required for care service extension.

3) Care Service Extension Agreement

If the scanner meets the criteria for care service extension, Scantech will offer the end user a care service extension agreement. This agreement will specify the terms, duration, and cost of the care service extension. Once the agreement is signed and payment is received, the care service period will be extended accordingly.

4) Exclusion of Liability

Standard or premium care does not cover damage or defects caused by misuse, negligence, accidents, unauthorized modifications, or improper handling of the scanner.

5) Care Service Process

Customers or authorized distributors requiring care service must adhere to the care process outlined by Scantech. These processes will be communicated separately to ensure a smooth and efficient care service experience.
